

Devuan apt update error

Running apt update on my Devuan machine today results in these:

```
# apt update
Get:1 http://deb.devuan.org/merged chimaera InRelease [33.9 kB]
Err:1 http://deb.devuan.org/merged chimaera InRelease
  The following signatures were invalid: EXPKEYSIG BB23C00C61FC752C Devuan
Repository (Amprolla3 on Nemesis) <repository@devuan.org>
Get:2 http://deb.devuan.org/merged chimaera-security InRelease [26.5 kB]
Err:2 http://deb.devuan.org/merged chimaera-security InRelease
  The following signatures were invalid: EXPKEYSIG BB23C00C61FC752C Devuan
Repository (Amprolla3 on Nemesis) <repository@devuan.org>
Get:3 http://deb.devuan.org/merged chimaera-updates InRelease [26.5 kB]
Err:3 http://deb.devuan.org/merged chimaera-updates InRelease
  The following signatures were invalid: EXPKEYSIG BB23C00C61FC752C Devuan
Repository (Amprolla3 on Nemesis) <repository@devuan.org>

```

used instead.

It turns out that the keyring has been rebuilt ([read post #7](#)). More than one way to fix it - I choose this one:

```
rm -rf /var/lib/apt/lists/*  
apt update --allow-insecure-repositories  
apt install devuan-keyring --allow-unauthenticated
```

note: removing all in list may be overkill - maybe try removing just *deb.devuan.org_merged_dists_chimaera_InRelease* instead? keep in mind that some pc may still use *pkgmaster.devuan.org*

All is well now... and that is all I have to say about that.

[devuan](#), [linux](#), [issue](#)
