

Using UniMAP Thesis Latex template with TexLive

On Slackware

- texlive is now default! (used to be tetex)
- get texlive-extra from <https://slackbuilds.org>

On Devuan

- install

```
$ apt install texlive texlive-latex-extra texlive-science
```

- install

```
$ apt install texlive-lang-other texlive-fonts-extra texlive-font-utils
```

- need to check this

```
$ apt install texlive-bibtex-extra biber
```

biber package info text says it breaks texlive-bibtex-extra

Edited 20230922 Fixed wrong package name

[latex](#), [texlive](#), [linux](#)
