

Getting Slackware

The official way to do this is, of course, to get it from slackware.com.

Personally, I have [getslack](#), a bash script based on (more accurately, a trimmed-down version of) the excellent (he termed it *infamous*) [mirror-slackware-current.sh](#) by [Alien Bob](#). When going down this path, the next step would be to prepare the installation media.

Slackware Installer ISO Image

Slackware Installer ISO Image

I no longer need an ISO image (refer to USB installer below). But, I have [slack2iso](#) script (also based on Alien Bob's script) can help in creating one using the tree downloaded by `getslack`.
